leetcode.com/u/Chauhan-Ashleshaaa11

OBJECTIVE

Full Stack Developer proficient in building scalable and responsive web applications using MongoDB, Tailwind CSS, Express.js, React, and Node.js, with hands-on experience in integrating RESTful APIs and AI/ML capabilities into backend systems.

EDUCATION

Abdul Kalam Technical University (AKTU)

October 2023 – July 2027

B.Tech – Computer Science & Engineering (AI Specialization)

Heliger Borden Education Centre

May 2021 – May 2023

Senior Secondary (ISC Class XII) — 72.2% | High School (ICSE Class X) — 86.6%

TECHNICAL SKILLS

Languages: C++, JavaScript (ES6+), Python

Frontend: HTML, CSS, React.js, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs

Generative AI & Deep Learning: Generative AI Concepts, LLMs, Transformer Architecture, Neural Networks, Deep Learning, Embedding & Vector Representation, Text Summarization, Custom Model Training & Evaluation

Databases: MySQL, MongoDB

Tools & Cloud: VS Code, Postman, Git, GitHub, AWS

CS Fundamentals: Data Structures, OOP, Operating Systems, DBMS

PROJECTS

Vitara Real Estate

April 2025 – May 2025

github.com/AshleshaChauhan-11/Vitara-Real-Estate

- Integrated AI-powered property recommendations and smart search to enhance user experience.
- Developed an intelligent chatbot for automated property queries and lead management.
- Implemented AI-driven pricing insights and automated property description generation.

DiagnoZen

Ongoing

github.com/AshleshaChauhan-11/DIAGNOZEN

- Developing in a group of 3 an AI-powered healthcare web app for early disease prediction and analysis.
- Integrating machine learning models with a MERN stack-based application.
- Building RESTful APIs and designing a responsive frontend using React and Tailwind CSS.

SafeCrowdAI

Ongoing

github.com/AdibaHusain/SafeCrowdAI

- Building in a group of 4 an AI-based crowd monitoring system to detect and analyze crowd density in real-time.
- Implementing computer vision techniques for safety and surveillance applications.
- Developing backend services and APIs for data processing and visualization.

ACHIEVEMENTS

- Project SafeCrowd AI got qualified for the State-Level Buildathon in the NxtWave Buildathon Competition.
- Solved 300+ Data Structure and Algorithm problems on LeetCode.

CERTIFICATES

- Introduction to Generative AI – Google Cloud (2025)
- TCS iON Career Edge – Young Professional – TCS (2025)
- HTML, CSS3, JavaScript, Python – Infosys Springboard (2025)
- React JS – Simplilearn (2026)
- Node.js & Express.js – Simplilearn (2026)
